

California

In 2000, 22% of all California households spoke Spanish at home, compared to just 10% of all U.S. households. Nine percent spoke an Asian language at home, compared to just 3% of U.S. households.

Foreign-born residents in California accounted for 26% of the state's population in 2000, compared to 11% of U.S. residents.

The top 10 counties with the greatest percentage increase of workers traveling an hour or more to jobs are in the Central Valley and the outskirts of the Bay Area. (Overall, 10% of California workers have a one way commute that is greater than one hour.)

The top 7 counties with the greatest percentage change in population due to migration out of the county were all in the S.F. Bay Area. Los Angeles, Imperial, Santa Barbara and Orange Counties ranked next highest.

Annual Income: \$14,040
Families with 1 minimum wage earner
 Care for one infant in a licensed family child care home: 54% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
 Care for one infant in a licensed family child care home: 27% of income

Annual Income: \$51,844
Families with 2 entry level public school teachers working in the county⁸
 Care for one infant in a licensed family child care home: 15% of income

Alameda County

Alameda County is one of 11 counties in California that experienced net domestic migration out of the county.

The population growth in the county resulted from high rates of natural increase (births over deaths) and foreign immigration. Both rates rank in the top 10 across the state.

Alameda County has one of the highest percentages of households speaking an Asian language at home. It is also one of five counties with the greatest percentage of child care centers with staff speaking Chinese (19%), Tagalog (10%), or Vietnamese (9%).

Alameda County ranks 6th in the number of residents over the age of 24 to hold at least a 4-year college degree.

Management and professional jobs account for 42% of employment.¹

Alpine County

Alpine County has the fewest residents and the fewest children birth to 13 in California.

While foreign-born residents comprise just 3% of the county's population (compared to 26% statewide) 19% are Native American (compared to 1% in the state.)

(U.S. Census Bureau, 2000)

The percentage of women in sales and office occupations is three times higher than men in the same types of occupations (40% vs. 13%). The percentage of men in construction, production, and related activities is 4 times higher than women in those occupations (28% vs. 7%).¹

Alpine County is one of just 6 counties in California with an unemployment rate higher than 8%.

Amador County

Amador County is one of 12 counties with fewer births than deaths between 2000 and 2004. However, the population increased between those years because of domestic migration into the county.

Fewer than 5% of the residents of Amador county are foreign born.

Management and professional jobs account for 30% of employment in Amador County; service occupations 22%; sales and office jobs 24%.¹

Amador County is one of the 5 counties with the greatest percentage of child care requests from parents looking for work.

The percentage increase in women in the labor force was the 6th highest in the state between 1990 and 2000.

Butte County

The percentage increase between 1990 and 2000 of workers traveling an hour or more to work was substantially higher for Butte County (59%) than for the state (34%).

Management and professional jobs account for 32% of all employment in the county; sales and office jobs 27%.¹

Twenty-eight percent of the children in Butte County live in poverty, compared to 20% statewide.

The percentage of women in sales and office occupations is twice as high as men in the same types of occupations (36% vs. 18%). Conversely, the percentage of men in construction, production, and related activities is almost 6 times higher than women in those occupations (34% vs. 6%).¹

Families with 2 minimum wage earners
 Care for one infant in a licensed family child care home: 23% of income

Annual Income: \$56,578
Families with 2 entry level public school teachers working in the county⁸
 Care for one infant in a licensed family child care home: 11% of income

Calaveras County

Calaveras County was one of 12 counties in California with fewer births than deaths in the years between 2000 and 2004.

The 9% increase in population in the county was primarily the result of domestic migration of residents from other counties and states into Calaveras.

Calaveras County's percentage increase of women in the workforce is the 3rd highest in the state.

The county is one of just 16 where 40% or more of employed men work in construction, production, or related jobs.¹

While the median income for a family with a child under 18 (\$46,823) is very similar to California (\$48,836), the percentage of residents over 24 with at least a 4-year college degree, is significantly lower than the state.¹

Calaveras is one of the counties with the greatest percentage of child care requests from parents looking for work.

Care for one infant in a licensed family child care home: 23% of income

Annual Income: \$68,000
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 9% of income

Colusa County

Colusa County is one of the 13 counties in the state in which a higher percentage of public school children are English language learners (39%) than in the state as a whole (25%).
(CA Dept. of Ed. (2004/05))

The county ranks 8th in percentage of foreign-born residents and 5th in the percentage of Spanish-speaking households.

Colusa is one of the 10 counties with the highest percentage of child care centers and family child care homes speaking Spanish.

The county's percentage increase (between 1990 and 2000) in people traveling an hour or more to work ranked 4th highest in the state.

Farming, fishing, and forestry account for 15% of employment, the highest percentage in the state. ¹

Colusa County is one of 6 counties with an unemployment rate over 8%.

Contra Costa County

Contra Costa County is one of the 10 counties with the most residents and the most children birth to 13 years.

The county has the 4th highest median rent for a 2-bedroom apartment and the 4th highest median income for a family with children under 18 (\$71,688).¹

Contra Costa County has the 9th highest percentage of households speaking an Asian language at home and is one of 5 counties with the greatest percentage of family child care providers who speak Tagalog (4%).

Contra Costa County ranks 5th in the percentage of residents over the age of 24 with 4-year college degrees or higher.

The percentage of women in sales/office occupations (38%) is almost twice as high as men (20%) in those occupations; the percentage of men in construction, production, and related activities (28%) is almost 6 times higher than women in those occupations (5%).¹

The county is one of 9 where 40% or more workers are in management/professional positions.¹

Del Norte County

Del Norte is one of the 10 counties in California with the fewest children birth to 13 years.

Domestic migration into the county was the primary factor contributing to the county's population growth between 2000 and 2004.

The percentage of children living in poverty in Del Norte County is the 4th highest in the state.

Service jobs account for 32% of employment, the highest percent in the state. (Professional occupations account for 24%; sales and office occupations, 22%)¹.

The percentage of women in sales and office occupations is almost three times as high as men in those occupations (33% vs. 12%); conversely, the percentage of men in construction, production, and related activities is almost 8 times higher than women in those occupations (31% vs. 4%).¹

Availability of Licensed Child Care

In Del Norte County, there are an estimated 2,471 children ages 0-13 with parents in the labor force³ and 1,002 licensed child care slots.

Licensed child care is available for 41% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children, and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 23% infant/toddler; 44% preschool; 33% school-age
- Schedule requested: 90% full-time (0-5 years); 19% part time (0-5 years)
- Reasons for needing care: 84% employment; 11% school/training; 2% looking for work

Child Care and Family Budgets

How child care fits into a Del Norte County family's budget (Housing⁶: \$8,040; Preschooler in a licensed center⁷: \$4,482)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 45% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 22% of income

Annual Income: \$70,084
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 9% of income

El Dorado County

Domestic migration into the county was the primary factor contributing to the county's population growth, 2000 to 2004.

The percent increase of workers commuting one hour or more to work ranked 11th in the state.

El Dorado County has the 9th highest percentage increase of working women in the state. Median income for a family with children under 18 is also 9th highest in the state (\$60,485).¹

The percentage of children living in poverty is the 5th lowest in the state.

Professional jobs account for 37% of employment; sales/office occupations, 25%; service occupations, 19%.¹

The percentage of women in sales and office occupations (35%) is more than twice as high as men (16%) in those jobs. The percentage of men in construction, production, and related jobs is nearly 8 times higher than women in those jobs (30% vs. 4%).¹

Fresno County

Fresno County is both one of the 10 most populated counties in California and one of the 10 with the largest number of children birth to 13.

Fresno is one of 13 counties in the state with a higher percent of public school children who are English language learners (27%) than in the state as a whole (25%).
(CA Dept. of Ed., 2004/5)

Fresno County has the 6th lowest median income for a family with children under 18 (\$33,460)¹ in the state; the percentage of children living in poverty is the 5th highest in California.

Farming, fishing, and forestry jobs in Fresno County account for 7% of employment - compared with 1% in California.¹

The percentage increase in the number of Fresno County employed residents with a one-way commute of one hour or more is significantly higher than the state (60% vs. 34%).

Humboldt County

Domestic migration into Humboldt County was the primary factor contributing to population growth, 2000 to 2004.

Between 1990 and 2000 the percentage increase of Humboldt County women in the workforce was almost twice that of California (16% vs. 9%).

Twenty-eight percent of the children in Humboldt County live in poverty, compared with 20% in the state as a whole.

The percentage of county residents over the age of 24 with at least a 4-year college degree (23%) is lower than California (27%).

Professional jobs account for 32% of employment in the county; sales/office occupations: 25% (the percentage of women in these positions, 34%, is more than twice that of men, 16%); service occupations: 20%.¹

Availability of Licensed Child Care

In Humboldt County, there are an estimated 12,606 children ages 0-13 with parents in the labor force³ and 3,269 licensed child care slots.

Licensed child care is available for 26% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children, and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 39% infant/toddler; 36% preschool; 25% school-age
- Schedule requested: 38% full-time (0-5 years); 63% part time (0-5 years)
- Reasons for needing care:
74% employment; 12% school/training; 7% looking for work

Child Care and Family Budgets

How child care fits into a Humboldt County family's annual budget (Housing⁶: \$8,244; Preschooler in a licensed center⁷: \$6,109)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 47% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 24% of income

Annual Income: \$51,844
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 13% of income

Imperial County

Imperial County was one of just 13 counties in California to experience a greater than 10% growth in population between 2000 and 2004.

The county is one of just 11 to experience net migration out of the county and one of 11 where foreign immigration accounted for more than 50% of the population increase.

Imperial County has the 5th highest percentage of foreign-born residents and ranks highest in the state for its percentage of public school children who are English language learners (45%).
(CA Dept. of Ed., 2004/5)

The percentage of households in Imperial County speaking Spanish (66%) is the highest in the state (and is substantially higher than the next highest ranking county, 37%).

The county's median income for a family with children under 18 is the 5th lowest in the state (\$32,747).¹

 Care for one infant in a licensed family child care home: 9% of income

Inyo County

Although Inyo County is one of the largest counties in terms of square miles (10,203), it has fewer residents than most other counties in the state.

While the county experienced a natural decrease in population between 2000 and 2004 (more deaths than births) the total population actually grew as a result of domestic migration into the county. (Inyo is one of just 12 counties in California where domestic migration into the county accounted for more than 90% of the population increase.)

Sixty-six percent of women with a child under 6 are in the labor force, compared to 55% in the state as a whole.

Professional jobs account for 28% of employment; sales and office occupations, 25%; service occupations, 23%.¹

Kings County was one of just 13 counties to experience population growth greater than 10% between 2000 and 2004.

Kings County has the 7th highest percentage of households speaking Spanish at home.

The county ranks 6th in the percentage of child care centers with Spanish-speaking staff and 9th in the percentage of Spanish-speaking family child care providers. It ranks 5th in the percentage of child care centers with Chinese-speaking staff (6%).

Kings County has the state's lowest percentage of licensed child care available for children with working parents.

Kings County's percentage increase of women in the workforce is more than 3 times California (28% vs. 9%).

Availability of Licensed Child Care

In Kings County, there are an estimated 16,300 children ages 0-13 with parents in the labor force³ and 3,025 licensed child care slots.

Licensed child care is available for 19% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 37% infant/toddler; 48% preschool; 15% school-age
- Schedule requested: 79% full-time (0-5 years); 26% part time (0-5 years)
- Reasons for needing care:
59% employment; 22% school/training; 22% looking for work

1. A breakdown of slots by age is not available for family child care homes because their licenses are not specific to particular age groups.
2. Full-time (30 or more hours/week) and part-time are a % of total slots. Non-traditional (evenings, weekends, overnight) are a % of total sites.
3. Network estimate based on CA DOF Projections, 2004: either two parents or single head of household in labor force.
4. These types of care are not included in the supply of licensed care available.
5. Some parents find child care without using R&Rs. These requests do not necessarily represent total demand, but they do reflect trends.
6. U.S. HUD. Median rent for a 2-bedroom unit. 2004.
7. Cost estimates 2004/5; 2002 Regional Market Rates with CPI Inflation Factor. Full-time.

Child Care and Family Budgets

How child care fits into a Kings County family's annual budget: (Housing⁶: \$7,188; Preschooler in a licensed center⁷: \$5,284)

Annual Income: \$14,040
Families with 1 minimum wage earner
 Care for one infant in a licensed family child care home: 38% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
 Care for one infant in a licensed family child care home: 19% of income

Annual Income: \$67,880
Families with 2 entry level public school teachers working in the county⁸
 Care for one infant in a licensed family child care home: 8% of income

Lake County

A natural decrease in population (more deaths than births) was offset in Lake County by domestic migration into the county, which accounted for more than 95% of the population increase in the years 2000 to 2004.

Lake County ranks 5th in the percentage of child care centers in the state with Tagalog-speaking staff (4%).

The county's percentage increase in the number of workers with a one-way commute of one hour or more ranked 3rd in the state.

Lake County has the 5th highest percentage of child care requests from parents who seek care because they are looking for work.

Professional jobs account for 27% of employment; sales and office occupations, 24%; service occupations, 22%.¹

Lassen County

Median rent for a 2-bedroom apartment is one of the lowest in the state.

Lassen County has the second smallest percentage of foreign-born residents.

The median income for a family with children under 18 is relatively high (\$42,738) compared with other counties in northern California, while the percentage of the county's residents over 24 having at least a 4-year college degree is the 5th lowest in the state.¹

Professional jobs account for 30% of employment; service occupations, 28%; sales/office occupations, 21%. (Lassen is one of just 3 counties with more than 25% of workers in service occupations.)¹

Los Angeles County

Los Angeles, the county with the largest population in the state, is home to nearly 30% of all children birth to 13 years and has the greatest number of licensed child care centers and family child care homes (2004).

The population of Los Angeles County grew 7% between 2000 and 2004, from both natural increase (more births than deaths) and foreign immigration. The county is one of 11 in the state that experienced net domestic migration out of the county.

Los Angeles County has the 2nd highest percentage of foreign-born residents.

The county is one of 13 in California in which a higher percentage of public school children are English language learners (32%) than in the state as a whole (25%).

(CA Dept. of Ed., 2004/5)

Los Angeles is one of only 5 California counties in which 10% or more of the women in the workforce work in construction, production, or related occupations.¹

Los Angeles ranks 6th in percentage of households speaking Spanish at home; 7th in speaking an Asian language at home.

Madera County

Madera was one of just 13 counties to experience population growth greater than 10% between 2000 and 2004.

Madera is one of 13 counties where there is a higher percentage of public school children who are English language learners than there are in the state as a whole (31% vs. 25%).

(CA Dept. of Ed. 2004/5)

Madera County has the 8th highest percentage of households speaking Spanish at home.

The percentage of children living in poverty in Madera County is the 2nd highest in the state.

The county ranks 5th in the percentage of child care centers with Spanish-speaking staff and 6th in the percentage of Spanish-speaking family child care providers.

Madera County's percentage increase of women in the workforce is the 5th highest in the state.

Availability of Licensed Child Care

In Madera County, there are an estimated 15,461 children ages 0-13 with parents in the labor force³ and 3,380 licensed child care slots.

Licensed child care is available for 22% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children, and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 36% infant/toddler; 34% preschool; 30% school-age
- Schedule requested: 91% full-time (0-5 years); 13% part time (0-5 years)
- Reasons for needing care: 81% employment; 16% school/training; 1% looking for work

Child Care and Family Budgets

How child care fits into a Madera County family's annual budget (Housing⁶: \$7,560; Preschooler in a licensed center⁷: \$5,885)

Annual Income: \$14,040
Families with 1 minimum wage earner
 Care for one infant in a licensed family child care home: 39% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
 Care for one infant in a licensed family child care home: 19% of income

Annual Income: \$72,420
Families with 2 entry level public school teachers working in the county⁸
 Care for one infant in a licensed family child care home: 8% of income

Marin County

Marin County's 2% population growth, 2000 - 2004 resulted from rates of natural increase and foreign immigration that were in the state's top 10. A high rate of migration out of the county mitigated the overall population increase.

Marin has one of the highest median rents in the state for a 2-bedroom apartment and the highest median income (\$89,224 vs. CA median of \$48,836) for families with children under 18.¹ (The cost for child care for a pre-schooler in Marin is almost 3/4 of a minimum wage salary.)

The percentage of Marin residents over 24 with at least a 4-year college degree (51%) and the percentage of workers in professional occupations (53%) are the highest in the state.¹

Marin County has the 3rd highest percentage of households speaking languages other than English, Spanish, or an Asian language.

Mariposa County

Mariposa County is one of 12 counties in California that had fewer births than deaths between 2000 and 2004. However, the population increased due to domestic migration into the county.

Mariposa County has the 4th lowest percentage in the state of foreign-born residents and ranks 2nd highest in the state for its percentage of households speaking English at home.

The percentage increase of women in the workforce is the 14th highest in the state.

Professional jobs account for 29% of employment; sales and office occupations, 25%; service occupations, 22%.¹

Mendocino County

The percentage increase in workers with a one-way commute of one hour or more (56%) in Mendocino County is significantly higher than the state (34%).

The county's percentage increase of women in the workforce is almost twice California's.

Twenty-six percent of the children in Mendocino County live in poverty, compared to 20% statewide.

Mendocino County is one of 16 California counties in which 40% or more of male workers are in construction, production, or a related occupation.¹

Professional jobs account for 30% of employment; sales and office occupations, 23%; service occupations, 19%.¹

The percentage of women in sales and office occupations (34%) is more than twice as high as men in those occupations (13%).¹

Merced County

Merced County was one of 13 counties to experience population growth greater than 10% between 2000 and 2004.

The county ranks 4th in the state in percentage of households speaking Spanish at home.

Merced County is one of 13 counties where the percentage of public school children who are English language learners is higher than in the state as a whole (32% vs. 25%).

(CA Dept. of Ed. 2004/05.)

The county ranks 8th in the percentage of child care centers with Spanish-speaking staff; 7th in the percentage of Spanish-speaking family child care providers; and 1st in the percentage of child care centers with staff who speak languages other than English, Spanish, Chinese, Tagalog, Vietnamese, or Korean.

The percentage of children living in poverty is the 11th highest in the state.

How child care fits into a Merced County family's annual budget (Housing⁶: \$7,932; Preschooler in licensed center⁷: \$5,583)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 45% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 22% of income

Annual Income: \$63,344
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 10% of income

Modoc County

Modoc is one of 12 counties in California with fewer births than deaths between 2000 and 2004. This was offset by domestic migration into the county. (Modoc was one of 9 counties where domestic migration accounted for more than 100% of the population increase.)

Modoc is one of 10 counties with the fewest residents and the fewest children birth to 13 years.

The percentage of children in Modoc County living in poverty is the 7th highest in the state.

Thirty percent of workers are employed in professional jobs; 22% in sales and office occupations; 21% in service occupations.¹

The percentage of women in sales and office jobs (37%) is more than 4 times as high as men in those positions (8%). The percentage of men (36%) is 12 times more than women (3%) in construction, production, and related occupations.¹

Monterey County

Monterey County's population growth of 6% from 2000 to 2004 is the result of natural increase (more births than deaths) and foreign immigration at rates that were in the top 11 in the state. Monterey also experienced domestic migration out of the county at a rate that mitigates the overall population increase.

The county has the 7th highest percentage of foreign-born residents.

The county has the 10th highest percentage of households speaking Spanish at home.

The county ranks 4th in the percentage of child care centers with Spanish-speaking staff and 3rd in the percentage of Spanish-speaking family child care providers.

Monterey County's percentage increase in the number of workers with a one-way commute of one hour or more ranked 5th in the state.

Care for one infant in a licensed family child care home: 13% of income

Napa County

Napa County's population increase between 2000 and 2004 was due primarily to domestic migration into the county.

The county's median rent for a 2-bedroom apartment is 30% higher than the state median and the median income for a family with children under 18 (\$57,314) is 17% higher than the state (\$48,836).¹

The percentage of children living in poverty in Napa County is the 12th lowest in the state.

Professional jobs account for 35% of employment; sales and office occupations, 24%; and service occupations, 18%.¹

The percentage of women in sales and office occupations is more than twice as high as men in those occupations (34% vs. 15%); the percentage of men in construction, production, and related activities is more than 5 times higher than women in those occupations (33% vs. 6%).¹

Child Care and Family Budgets

How child care fits into a Napa County family's budget: (Housing⁶: \$14,052; Preschooler in licensed child care center⁷: \$6,940)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 60% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 30% of income

Annual Income: \$77,226
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 11% of income

Nevada County

Nevada County's population increase was due primarily to domestic migration into the county.

The county's median rent for a 2-bedroom apartment is 6% lower than the state median. The median income for a family with children under 18 (\$52,068) is almost 7% higher than the state median (\$48,836).¹

The percentage of children in Nevada County living in poverty is the 6th lowest in the state.

Nevada County's percentage increase in the number of workers with a one-way commute of one hour or more (71%) is significantly higher than California (34%).

Nevada County's percentage increase of women in the workforce is the 10th highest in the state.

Professional jobs account for 34% of employment; sales and office occupations, 27%; service occupations, 16%.¹

Orange County

Orange County is one of the 10 counties with the most residents and the most children birth to 13 years.

The county's population growth from 2000 to 2004 resulted from rates of natural increase and foreign immigration that were in the state's top 14. However, domestic migration out of the county mitigated the overall population increase.

The county has one of the highest median rents in the state for a 2-bedroom apartment and one of the highest median incomes (\$60,192 vs. CA \$48,836) for a family with children under 18.¹

Orange County ranks 6th in the percentage of households speaking an Asian language at home.

The county ranks 4th in the percentage of child care centers with Vietnamese-speaking staff (7%).

Plumas County

Plumas County is one of 10 counties with the fewest residents and the fewest children birth to 13 years.

Plumas County is one of 12 counties in California with fewer births than deaths between 2000 and 2004, resulting in a natural population decrease of 45%. This was offset by an increase in population due to domestic migration into the county.

The county has the 3rd lowest percentage of foreign-born residents.

Plumas County has the 3rd highest percentage of households speaking English at home.

While the percentage of children living in poverty matches the state, the percentage of residents over 24 with at least a 4-year college degree is lower than the state (18% vs. 27%).

Availability of Licensed Child Care

In Plumas County, there are an estimated 1,637 children ages 0-13 with parents in the labor force³ and 643 licensed child care slots.

Licensed child care is available for 39% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children, and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 27% infant/toddler; 42% preschool; 31% school-age
- Schedule requested: 62% full-time (0-5 years); 57% part time (0-5 years)
- Reasons for needing care: 88% employment; 8% school/training; 10% looking for work

Child Care and Family Budgets

How child care fits into a Plumas County family's budget (Housing⁶: \$6,864; Preschooler in licensed child care center⁷: \$6,349)

Annual Income: \$14,040
Families with 1 minimum wage earner
 Care for one infant in a licensed family child care home: 41% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
 Care for one infant in a licensed family child care home: 20% of income

Annual Income: \$60,484
Families with 2 entry level public school teachers working in the county⁸
 Care for one infant in a licensed family child care home: 9% of income

Riverside County

Riverside is one of 10 counties with the most residents and the most children birth to 13 years.

The county had the 2nd highest percentage population increase in the state, one of just 13 counties where the percentage increase of residents was greater than 10%.

Riverside is one of the 5 largest counties in the state (7,207 sq. miles).

Riverside County's percentage increase of women in the workforce ranks 8th highest in the state.

Professional jobs account for 28% of employment; sales and office occupations, 27%; and service occupations, 17%.¹

The percentage of women in sales and office occupations is more than twice as high as men in those occupations (39% vs. 18%); the percentage of men in construction, production, and related activities is more than 4 times higher than women in those occupations (40% vs. 9%).¹

Sacramento County

Sacramento County is one of the 10 counties in the state with the most residents and the most children (birth to 13 years).

The county is one of just 13 that experienced a population increase of more than 10% between 2000 and 2004.

Sacramento County has one of the highest percentages of households speaking languages other than English, Spanish, or an Asian language.

While 13% of family child care providers in Sacramento County speak Spanish, 19% speak languages other than Spanish or English.

The 76% increase in the number of workers traveling an hour or more to work between 1990 and 2000 is substantially higher than California (34%).

Professional jobs account for 36% of employment; sales and office occupations account for 30%.¹

San Benito County

San Benito County's population growth resulted primarily from a significant rate of natural increase. (It was one of just 10 counties where the differential between births and deaths, 2000 to 2004, accounted for 60% or more of the population increase.)

The county has the 3rd highest percentage of households speaking Spanish at home.

The county ranks 3rd in the percentage of child care centers with Spanish-speaking staff, 5th in the percentage of Spanish-speaking family child care providers.

The median income for a family with children under 18 (\$59,340) ranks 12th highest in the state and the percentage of children living in poverty is the 7th lowest in the state.¹

San Benito County's percentage increase in the number of workers with a one-way commute of one hour or more and its percentage increase of women in the workforce both ranked 2nd in the state.

Care for one infant in a licensed family child care home: 10% of income

San Bernardino County

At 20,053 sq. miles, San Bernardino is the largest county in California, and one of the 10 counties with the most residents and the most children birth to 13 years.

San Bernardino County is one of the 13 counties that experienced a population increase of more than 10% between 2000 and 2004.

The county has the 12th highest percentage of Spanish-speaking households.

The percentage increase of women in the workforce (19%) is significantly higher than the state (9%), but the availability of licensed care for children with parents in the labor force is the 4th lowest in the state.

Professional jobs account for 28% of employment; sales and office occupations, 27%; and service occupations, 16%.¹

Care for one infant in a licensed family child care home: 11% of income

San Diego County

San Diego is one of 10 California counties with the most residents and the most children birth to 13 years.

The percentage of households speaking Spanish at home and those speaking an Asian language at home are slightly lower than California.

While the median income for a family with children under 18 (\$49,046) is just slightly above the state's (\$48,836)¹, the median rent for a 2-bedroom apartment is more than 30% higher.

San Diego County's percentage increase in the number of workers with a one-way commute of one hour or more (64%) is significantly higher than California (34%).

Professional jobs account for 38% of employment; sales and office occupations, 27%; and service occupations, 16%.¹

San Francisco County

San Francisco ranks 1st in percentage of households speaking an Asian language at home and 4th speaking a language other than English, Spanish, or an Asian language.

The percentage change in the population due to foreign immigration is the highest in the state.

San Francisco is one of 11 counties that experienced net domestic migration out of the county.

San Francisco is one of 13 counties with a higher percentage of public school children who are English language learners (29%) than the state as a whole (25%). (CA Dept. of Ed. 2004/05)

The county ranks 1st in the state in percentage of child care centers (52%) and family child care providers speaking Chinese (25%); 9% of centers have staff speaking Tagalog and 9% speaking Vietnamese.

San Francisco is one of the 5 counties with the highest percentage of same-sex partner households (2.7%).¹

San Joaquin County

San Joaquin County was one of just 13 counties to experience population growth greater than 10% between 2000 and 2004.

The county has the 8th highest percentage of households speaking an Asian language at home. The percentage of households speaking Spanish at home is close to California.

San Joaquin County's percentage increase in the number of workers with a one-way commute of one hour or more ranks 6th in the state.

At 22%, San Joaquin County's percentage increase of women in the workforce is more than twice the state (9%).

The percentage of children living in poverty is higher than the state and the percentage of residents 25 or older with a 4-year college degree or higher is significantly lower.

Professional jobs account for 27% of employment; sales and office jobs, 27%; and service occupations, 15%.¹

Child Care and Family Budgets

How child care fits into a San Joaquin County family's budget (Housing⁶: \$9,528; Preschooler in licensed child care center⁷: \$6,131)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 49% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 25% of income

Annual Income: \$64,000
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 11% of income

San Luis Obispo County

The percentage increase in the number of San Luis Obispo County workers commuting one hour or more each way is significantly higher than the state (59% vs. 34%).

San Luis Obispo County's population growth resulted primarily from domestic migration into the county.

The percentage increase of women in the workforce is higher than California.

The percentage of children in San Luis Obispo living in poverty is lower than the state (14% vs. 20%).

The percentage of residents 25 or older with at least a 4-year college degree is the same as the state.

Professional jobs account for 34% of employment; sales and office occupations, 25%; and service occupations, 19%.¹

The percentage of women in sales and office occupations is more than twice as high as men in those occupations (36% vs. 16%); conversely, the percentage of men in construction, production, and related activities is more than 5 times higher than women in those occupations (31% vs. 6%).¹

Availability of Licensed Child Care

In Santa Clara County, there are an estimated 192,322 children ages 0-13 with parents in the labor force³ and 50,559 licensed child care slots.

Licensed child care is available for 26% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children, and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 40% infant/toddler; 41% preschool; 19% school-age
- Schedule requested: 80% full-time (0-5 years); 23% part time (0-5 years)
- Reasons for needing care: 87% employment; 5% school/training; 5% looking for work

Child Care and Family Budgets

How child care fits into a Santa Clara County family's budget (Housing⁶: \$21,852; Preschooler in licensed child care center⁷: \$10,207)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 69% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 35% of income

Annual Income: \$72,124
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 13% of income

Santa Cruz County

The percentage change in the population due to natural increase (more births than deaths) is the second highest in the state and the percentage change due to foreign immigration is the 3rd highest. The county also experienced domestic migration out of the county, mitigating the overall population increase.

Santa Cruz is one of 13 counties in the state in which a higher percentage of public school children are English language learners than in the state as a whole (28% vs. 25%). (CA Dept. of Education 2004/05)

The county has the 8th highest percentage of Spanish-speaking family child care providers.

The percentage of children living in poverty is significantly lower than the state (14% vs. 20%) and the percentage of residents 25 or older with a 4-year college degree or higher is the 7th highest in the state.

Santa Cruz is one of 9 counties where 40% or more of employed residents are in management/professional occupations.¹

Care for one infant in a licensed family child care home: 16% of income

Shasta County

Shasta County is one of 15 counties in California where domestic migration accounted for more than 85% of the population increase between 2000 and 2004.

Shasta has the 10th lowest percentage of foreign-born residents and ranks 6th in the state for its percentage of households who speak English at home.

The county's percentage increase in the number of workers with a one-way commute of one hour or more is almost twice the state (67% vs. 34%).

The percentage of children living in poverty is higher than the state and the percentage of residents 25 or older with at least a 4-year college degree is significantly lower.

Professional jobs account for 30% of employment; sales and office occupations, 27%; and service occupations, 20%.¹

Sierra County

Sierra County is one of 10 counties with the fewest residents and children birth to 13.

It is the only county in the state that experienced a decrease in population between 2000 and 2004, resulting from a natural decrease (more deaths than births) that was not outweighed by foreign immigration and domestic migration into the county.

Sierra has the 5th lowest percentage of foreign-born residents and ranks 9th in the state for its percentage of households speaking English at home.

The county's percentage increase in the number of workers with a one-way commute of one hour or more is higher than the state (56% vs. 34%).

Sierra County's percentage increase of women in the workforce (37%) is more than 4 times California's (9%).

Siskiyou County

Siskiyou County is one of 12 counties in California that experienced more deaths than births between 2000 and 2004. This was offset by an increase in population due to high rates of domestic migration into the county. (The county was one of just 12 in which domestic migration accounted for more than 90% of the population increase.)

At 6,287 sq. miles, the county is one of the 5 largest counties in the state, geographically.

Siskiyou is one of the 10 counties with the lowest median rents for a 2-bedroom apartment and ranks 8th lowest in its median income (\$33,915) for a family with children under 18.¹

The percentage of children living in poverty is the 8th highest in the state, and the percentage of residents 25 or older with a 4-year college degree or higher is significantly lower than the state.

Professional jobs account for 31% of employment; sales and office occupations, 24%; and service occupations, 19%.¹

Availability of Licensed Child Care

In Siskiyou County, there are an estimated 3,937 children ages 0-13 with parents in the labor force³ and 1,388 licensed child care slots.

Licensed child care is available for 35% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children, and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 28% infant/toddler; 43% preschool; 29% school-age
- Schedule requested: 69% full-time (0-5 years); 31% part time (0-5 years)
- Reasons for needing care: 81% employment; 9% school/training; 1% looking for work

Child Care and Family Budgets

How child care fits into a Siskiyou County family's budget (Housing⁶: \$6,864; Preschooler in a licensed child care center⁷: \$6,484)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 48% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 24% of income

Annual Income: \$54,600
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 12% of income

Solano County

Solano County has the 5th highest percentage of households speaking an Asian language at home.

The county has the 2nd highest percentage of Tagalog-speaking family child care providers (6%).

54% of licensed child care slots are in family child care homes, 9th highest in the state and very high for the region.

The median rent for a 2-bedroom apartment and the median income for a family with children under 18 (\$57,879 vs. state, \$48,836)¹ are both above the California median.

The percentage of children living in poverty is the 11th lowest in the state.

Professional jobs account for 31% of employment; sales and office occupations, 28%; and service occupations, 16%.¹

Stanislaus County

Stanislaus was one of just 13 counties to experience population growth greater than 10% between 2000 and 2004.

The median rent for a 2-bedroom apartment is 16% lower than the state and the median income for a family with children under 18 (\$42,417) is 13% lower than the state (\$48,836).¹

The percentage of residents 25 or older with at least a 4-year college degree is well below the state (14% vs. 27%). The percentage of children living in poverty is close to the state.

Professional jobs account for 26% of employment; sales and office occupations, 26%; and service occupations, 15%.¹

Stanislaus is one of only 16 counties in which 40% or more of employed men work in construction, production, or related jobs, and one of 5 in which 10% or more of employed women are in those jobs.¹

The county ranks 2nd lowest in the state in its availability of licensed child care for children with parents in the labor force.

Sutter County

Sutter County was one of 13 counties to experience population growth greater than 10% between 2000 and 2004.

Compared to others in the region, the county has a relatively high percentage of foreign-born residents and households speaking Spanish at home.

Sutter ranks 5th in the state in its percentage of households speaking a language other than English, Spanish, or an Asian language.

The county's percentage increase in the number of workers with a one-way commute of one hour or more ranks 7th in the state.

Sutter County's percentage increase of women in the workforce (24%) is more than twice California (9%).

Availability of Licensed Child Care

In Sutter County, there are an estimated 10,298 children ages 0-13 with parents in the labor force³ and 3,067 licensed child care slots.

Licensed child care is available for 30% of children with parents in the labor force.*

* Some families choose friends and relatives (license-exempt caregivers) to care for their children, and programs for school age children are often not licensed by the state.⁴

Parent Requests to the R&R⁵

- Type of care requested: 35% infant/toddler; 39% preschool; 26% school-age
- Schedule requested: 83% full-time (0-5 years); 26% part time (0-5 years)
- Reasons for needing care: 78% employment; 16% school/training; 8% looking for work

1. A breakdown of slots by age is not available for family child care homes because their licenses are not specific to particular age groups.
2. Full-time (30 or more hours/week) and part-time are a % of total slots. Non-traditional (evenings, weekends, overnight) are a % of total sites.
3. Network estimate based on CA DOF Projections, 2004: either two parents or single head of household in labor force.
4. These types of care are not included in the supply of licensed care available.
5. Some parents find child care without using R&Rs. These requests do not necessarily represent total demand, but they do reflect trends.
6. U.S. HUD. Median rent for a 2-bedroom unit. 2004.
7. Cost estimates 2004/5; 2002 Regional Market Rates with CPI Inflation Factor. Full-time.

Child Care and Family Budgets

How child care fits into a Sutter County family's budget (Housing⁶: \$7,260; Preschooler in licensed child care center⁷: \$4,997)

Annual Income: \$14,040
Families with 1 minimum wage earner
 Care for one infant in a licensed family child care home: 40% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
 Care for one infant in a licensed family child care home: 20% of income

Annual Income: \$66,158
Families with 2 entry level public school teachers working in the county⁸
 Care for one infant in a licensed family child care home: 9% of income

Tehama County

Tehama County is one of 18 counties in California where domestic migration accounted for more than 75% of the population increase between 2000 and 2004.

The median rent for a 2-bedroom apartment and the median income for a family with children under 18 (\$34,174)¹ are among the 10 lowest in the state.

The percentage of residents 25 or older with at least a 4-year college degree is the 9th lowest in the state. The percentage of children living in poverty is the 10th highest.

The county's percentage increase in the number of workers with a one-way commute of one hour or more is higher than the state (56% vs. 34%).

Tehama County's percentage increase of women in the workforce is more than twice California (24% vs. 9%).

Trinity County

Trinity County is one of 10 counties with the fewest residents and the fewest children birth to 13.

Trinity County is one of 12 counties in California that experienced more deaths than births between 2000 and 2004. This was offset by an increase in population due to domestic migration.

Trinity has the lowest percentage of foreign-born residents and the highest percentage of households who speak English at home in the state.

The percentage of residents 25 or older with at least a 4-year college degree (16%) is well below the state (27%). The percentage of children living in poverty is the 6th highest in the state.

Professional jobs account for 28% of employment; sales and office occupations, 23%; and service occupations, 21%.¹

Tulare County

Tulare County's population growth resulted primarily from a natural increase (more births than deaths) and foreign immigration.

The county has the 2nd highest percentage of households speaking Spanish at home.

Tulare is one of the 13 counties in which there is a higher percentage of public school children who are English language learners than in the state as a whole (29% vs. 25%).
(CA Dept. of Ed 2004/05)

The county ranks 2nd in the state in its percentage of child care centers with Spanish-speaking staff and 4th in its percentage of Spanish-speaking family child care providers.

Tulare is the county with the 10th lowest percentage of residents 25 or older with at least a 4-year college degree.

Child Care and Family Budgets

How child care fits into a Tuolumne County family's budget (Housing⁶: \$8,820; Preschooler in licensed child care center⁷: \$4,749)

Annual Income: \$14,040
Families with 1 minimum wage earner
Care for one infant in a licensed family child care home: 39% of income

Annual Income: \$28,080
Families with 2 minimum wage earners
Care for one infant in a licensed family child care home: 20% of income

Annual Income: \$75,640
Families with 2 entry level public school teachers working in the county⁸
Care for one infant in a licensed family child care home: 7% of income

Ventura County

Ventura County's population growth resulted primarily from a natural increase (more births than deaths) and foreign immigration.

The median rent for a 2-bedroom apartment is 27% higher than the state and the median income for a family with children under 18 (\$62,310) ranks 7th highest in the state.¹

Ventura County's percentage of households speaking Spanish at home is extremely close to the state, as is its percentage of residents 25 or older with a 4-year college degree or higher.

The percentage of children living in poverty is lower than the state (13% vs. 20%).

Professional jobs account for 37% of employment; sales and office occupations, 27%; and service occupations, 13%.¹

The percentage of women in sales and office occupations is twice as high as men in those occupations (38% vs. 19%).¹

Care for one infant in a licensed family child care home: 14% of income

Yolo County

Yolo County was one of just 13 counties to experience population growth greater than 10% between 2000 and 2004.

Yolo County ranks 9th in the percentage of households speaking a language other than English, Spanish, or an Asian language at home.

The county ranks 9th in the state in its percentage of child care centers with Spanish-speaking staff.

The percentage increase of workers traveling an hour or more to work between 1990 and 2000 was more than twice California.

The percentage of residents 25 or older with a 4-year college degree or higher ranks 8th in the state.

Yolo is one of 9 counties where 40% or more of workers are in management/professional jobs.¹
