

Child Care Initiative Project (CCIP)

Fiscal Year 2024 - 2025 Capacity Building & Quality Improvement Impacts

Celebrating **40** Years of Supporting Home-Based Child Care!

Since its launch in 1985, the Child Care Initiative Project (CCIP) has been implemented by Child Care Resource & Referral (R&R) programs across California to strengthen the home-based child care workforce. Now celebrating 40 years of impact, CCIP has been available in all 58 counties of our state since 2002—helping to recruit, support, and provide professional development opportunities for home-based child care providers. CCIP proudly serves both Licensed Family Child Care Home (FCCH) providers and License-Exempt/Family, Friend, and Neighbor (LE/FFN) caregivers—especially those caring for infants, toddlers, and children in subsidized care.

Capacity Building

This fiscal year, CCIP supported **4,988 existing and prospective Family Child Care Home (FCCH) providers** with personalized technical assistance and guidance to become licensed, expand their programs, or re-open previously closed FCCHs—strengthening the supply of quality home-based care across our state.

289	365	252	100
Expanded from small to large	Expanded to nontraditional hours	Expanded to serve infants & toddlers	Reopened a closed program

1,704

CCIP participants received a new FCCH license

14,362

Estimated additional child care slots created in FY 24-25 across CA*

Quality Improvement

Through the implementation of CCIP, Child Care Resource & Referral (R&R) agencies enhanced the quality of all participating home-based child care programs by providing technical assistance, coaching, training, and learning opportunities tailored to meet the unique needs of providers and their communities.
