

Median Family Income

Closure to Supply Ratio

Summary: While overall there doesn't appear to be a between a county's income and their proportion of family child care providers who have closed (page 2), the maps show that the north and central valley regions of the state, which have lower median incomes, also experienced a greater proportion of family child care providers closing in 2021.

As the color darkens, median income increases (left), and the proportion of licensed centers and family child care homes who have permanently closed increases (right).

Data sources:
 Income Data: 2021 1-Year American Community Survey 2021 1-Year
 Closure and Provider Data: CA Department of Social Services, Community Care Licensing all closures in 2021

Table 1.

County	Annual Income	Closure to Provider Ratio
Trinity	\$41,784	31%
